

Projects

At AlphaScan, we know technology and how to put it to work for your business. Our team of engineers is certified in all major technologies and can guide you with all your technology decisions and projects.

All our engineers are local and are AlphaScan employees-- we never outsource.

Computer Upgrades and Migrations

Whether you need a new email server or you need to upgrade all your laptops to Windows 7, we can handle all your migrations and hardware upgrades. Call us with your project details or use our contact form and we'll respond right away.

Network Design

We can help you build and design the ideal network for your office environment. We have performed over 20,000 projects and chances are we've seen an environment just like yours and we know exactly the best solution for it.

Security Assessments

Wondering if your network and data are secure? We have a leading practice of IT security experts who can determine if you have any security issues and how to fix them. Fix security compromises before it can cause any serious damage to your business. Contact us for a Security Assessment.

Virtualisation Design and Implementation

We can help you through the entire process of choosing the right virtualisation technology and implementing it into your office environment. Let virtualisation save you money, storage space, energy consumed. Contact AlphaScan to put it to work for you, starting with a Virtualisation Assessment.

Office and Datacentre Moves

Moving your office and all your computers and servers can be a daunting task. Just call or email AlphaScan and we can take care of the entire move and setup in your new location. We can move your datacentres too.
